## **WARRANTY INFORMATION**

The following information must be provided when contacting the factory for warranty:

Selling Home & Park Dealer: \_\_\_\_\_  
Address: \_\_\_\_\_ Phone: (\_\_\_\_) \_\_\_\_\_  
City, State/Prov.: \_\_\_\_\_ Zip/Postal Code: \_\_\_\_\_  
V.I.N. (17 digits): \_\_\_\_\_  
Production or Unit # (located on driver door post label): \_\_\_\_\_  
Date of Delivery To Owner (Retail Purchaser): \_\_\_\_\_

## **A WORD TO ROADTREK OWNERS...**

This manual has been prepared to acquaint you with the operation, maintenance and warranties of your new **Roadtrek Motorhome Van**. Your vehicle has been designed, engineered and manufactured to provide you with the utmost in pleasure, dependability and quality. It is important that you read the contents of this manual, that of the Dodge or Chevrolet chassis and those of other components and follow the instructions and recommendations contained in each to help assure the most enjoyable and trouble free operation of your vehicle.

We would like to take this opportunity to thank you for selecting a **Home & Park** product -- and assure you of our continuing commitment to your recreational vehicle pleasure, safety and satisfaction.

## **INTRODUCTION**

This manual has been written to provide you with the information required to properly operate and maintain your new Roadtrek. After reading this manual, be sure to keep it in your vehicle as a reference. Your Home & Park dealer will be glad to answer any further questions about the operation of your vehicle.

## **IMPORTANT**

Every reasonable precaution has been undertaken in the preparation of this manual resulting in the utmost accuracy possible at the time of publication. However, due to the continuing improvement and refinement of our products and normal changes in information and procedures, Home & Park shall assume no responsibility whatsoever for errors or omissions in the manual's contents.

Further, Home & Park shall not be held liable or assume any obligations or responsibilities whatsoever for any loss, damage or injury directly or indirectly caused by, arising or resulting from, or as a consequence of the use or non-use of the information contained herein or the operation or non-operation of any items mentioned herein. And finally, Home & Park shall be indemnified and saved harmless from all losses, expenses, claims and demands whatsoever.

## **A.0. DAILY LIVING**

### **A.1. CAPTAIN'S SEATS**

To recline, pull up the recline control located on the lower right side of the seat and lean back.

To slide, pull the slide control located on the left underside of the seat outward and slide the seat either forward or back.

To swivel the seats from a forward facing position to a rearward facing position, be aware of the following:

- i) Ensure that the back of the seat is reclined as far forward as the recline control allows.
- ii) Slide the seat forward but not so far as to lose clearance of the engine cover.
- iii) Put the tilt steering wheel in the uppermost position.
- iv) Put the armrests down to allow clearance of the door handles and steering wheel.
- v) The swivel control is located on the center front underside of the seat and locks the seat in a forward facing position. To release, pull the swivel control to the right and turn the seat inward (clockwise for the driver seat and counter-clockwise for the passenger seat).
- vi) Swivel the seat to the desired position.
- vii) Once completed, lower the tilt steering wheel and adjust the recline and slide controls as desired.

To increase the adjustable lumbar support, turn the lumbar support control (located on the seat back at the base of the right armrest) clockwise. To reduce the support, turn the control counter-clockwise.

### **A.2. SEAT BELT USAGE**

The driver and passenger captain's seats and the lounge seat(s) immediately behind are designed to carry passengers while your vehicle is in motion and are equipped with seat belts installed for their protection. All passengers must be seated in these seats only with seat belts fastened while vehicle is in motion. All other seats are not to be occupied while vehicle is in motion.

The lap belts must be worn across the hips and not across the abdomen. Passengers must sit well back in the seat and in an upright position.

### **A.3. DINETTE TABLE**

The rear dinette table can be used with the front captain's seats and lounge seats (all models except 190-Popular) instead of the cloverleaf dining table. To use the dinette table at the front:

- i) Remove the cloverleaf table from its table leg.
- ii) Leave the table leg in the base in the floor at the front.
- iii) Swivel the driver captain's seat (see A.1.).
- iv) Place the dinette table on this table leg with the other end resting on the drink holders mounted on the wall below the awning window.

#### **A.4. CLOVERLEAF DINING TABLE**

To use the "leaves":

- i) Pivot the table into the desired position.
- ii) In a seated position, with one hand under the table, push the support device out toward you.
- iii) Let the "leaf" fall and push the support device back in to allow the "leaf" to be swung up parallel to the table surface.
- iv) Pull the support device back toward yourself (to support the extended leaf).

To return the "leaf" to its original position, follow these steps in reverse order.

#### **A.5. EXTERIOR ACCESS DOORS**

Most utilities are located behind the 2 exterior doors integrated within the running boards on the driver side of your vehicle. Items behind the smaller door located below the driver step well include: LP gas fill, tank valve, gauge and regulator, sewage hose assembly, black and grey water gate valve handles, and fresh water tank low point drain. Items behind the larger lockable door located to the rear of the driver step well include: power cord, city water connection, and external TV cable connection.

A large storage compartment is located behind the larger door integrated within the running boards on the driver side of your vehicle. A second storage compartment is also located behind the door on the passenger side of Chevrolet 190 and 210 models only. The maximum capacity of these storage areas is 70 Kg (150 lbs.).

#### **A.6. UNDER FLOOR STORAGE COMPARTMENT**

The under floor storage compartment is located beneath the floor at the rear side cargo door. Access is achieved by opening both cargo doors and then opening the compartment door. An electrical receptacle, located within this compartment, can be used for exterior service by routing the exterior item's electrical cord through the door opening and partially closing the rear side cargo door.

#### **A.7. REAR STORAGE TRUNK**

The rear storage trunk (not available with 170 or 190 models on Chevrolet chassis) is located beneath the floor at the very rear of your vehicle. Access to this area is achieved by opening the rear door and then opening the trifold cover in the floor directly in front of the rear bumper.

The rear table leg is positioned with the base at the rear of the storage trunk. To remove the leg, disengage the barrel bolt located on the underside of the table. Open the trifold cover and remove the leg.

Caution should be taken so as to not damage the trunk when driving on rough terrain or through uneven driveway entrances. Also, ensure that the rear vehicle door is closed properly to prevent water from entering the trunk.

#### **A.8. SPARE TIRE STORAGE AND REMOVAL**

For vehicles not equipped with an optional "Continental" spare tire carrier, the spare tire is stored within the right rear dinette seat base. Access to the spare tire is achieved by removing the right dinette seat cushion.

To remove the spare tire:

- i) Remove the right dinette seat cushion.
- ii) Disengage the two hooks on the inside of the spare tire storage portion of the dinette seat base.
- iii) Lift the spare tire storage portion of the seat base until it is above the floor.
- iv) Pull the spare tire storage portion of the seat base towards the center of your vehicle until the spare tire is fully exposed.
- v) Remove the spare tire.

To store the spare tire, perform these steps in reverse order.

For 170 or 190 models on Chevrolet chassis or other models equipped with an optional "Continental" spare tire carrier mounted on the rear door, to remove the spare tire:

- i) Release the locking clamp located on the underside of the chrome outer ring.
- ii) While holding the center fiberglass dish in place, spread the outer ring by pulling outward from the bottom.
- iii) Remove the center dish and outer ring from around the tire.
- vi) Using the tire iron, remove the lug nuts that secure the tire to the carrier.
- v) Brace yourself for the weight of the tire (40 Kg/80 lbs.), pull the tire from the carrier and lower it to the ground.

To store the spare tire, perform these steps in reverse order.

**CAUTION:** On vehicles equipped with an optional "Continental" spare tire carrier, hold onto the door securely during windy conditions and do not open the door with excessive force to prevent it from opening beyond its normal limitation and causing damage to the door or its hinges.

## **B.0. SLEEPING FACILITIES**

### **B.1. REAR DOUBLE BED (170-Versatile)**

To move the shifting wardrobe to provide room for the double bed:

- i) Disengage the barrel bolt on the shelf located above the toilet and swing the shelf down.
- ii) Support the rear wardrobe gable with your right hand using the handle on the rear side of the gable.
- iii) Disengage the barrel bolt on the front side of the gable.
- iv) With your clothes still hanging, shift the wardrobe gable down and to the front until the top of the lower portion of the gable is located in the channel on the lower edge of the upper portion of the gable. (To secure the wardrobe in this position while driving, secure the aluminum rod hanging from the swing-up shelf above the toilet to the screw mounted to the passenger side edge of the wardrobe gable.)
- v) Swing the shelf above the toilet up to support the bottom of your clothes and provide access to the toilet.
- vi) Secure the chains located on the swing-up shelf to the hooks located the underside of the stationary shelf above the toilet.

To remove the drawers below the stove to provide room for the double bed:

- i) Remove the upper drawer and place it on the floor between the gauchito seat boxes to the rear of the vehicle. (To secure the drawer while driving, be sure that the rear edge of the drawer rests in the aluminum receptacle located on the floor at the rear.)

- ii) Remove the lower drawer and place it on the floor in front of the upper drawer. (To secure the drawer while driving, be sure that the handle on the front of the upper drawer rests in the hole in the rear of the lower drawer.)
- iii) Disengage the barrel bolt on the rear side of the gable beside the stove.
- iv) Swing the lower portion of the gable down and to the front until it lies flat.

To convert the rear gaucho into a double bed:

- i) Open the rear doors of your vehicle to disengage the chains secured to the door posts that retain the gaucho back rest cushion in a vertical position.
- ii) Move the back rest cushion to the front of the bed area.
- iii) Unfold the wood support of the back rest cushion until it lies flat with the foam side up and between the seat cushion and the stove and wardrobe gables.
- iv) Remove the top piece of foam of the back rest cushion.
- v) Place this piece of foam on the visible wood support.
- v) Unfold the upper piece of foam of the seat cushion to the front.

To access the drawers stored on the floor while the double bed is set up:

- i) Lift the front of the floor section where the drawers are stored.
- ii) Slide this section of floor forward until the desired drawer contents are visible.

To convert back to a dinette, perform these steps in reverse order.

## **B.2. REAR DOUBLE BED (190-Versatile and 190-Independent)**

To convert the dinette into a double bed:

- i) Remove the table and legs from their bases and place the table on the lateral supports located on the upper edge of the seat base boxes.
- ii) Starting on the left side, move the seat cushion to the right side.
- iii) Pull the left back rest cushion inward and down until it lies flat.
- iv) Push this cushion out against the interior wall of your vehicle.
- v) Move both seat cushions over to the left side and repeat the fourth step with the right back rest cushion.
- vi) Place the inner edges of the two seat cushions together and lay them flat.

To convert back to a dinette, perform these steps in reverse order.

## **B.3. REAR TWIN BEDS (190-Popular and 210-Popular)**

To convert the dinette into twin beds:

- i) Remove the table and legs from their receptacles and place the table on the lateral supports located on the upper edge of the seat base boxes (to act as a night table) or store the table between the driver seat and wardrobe (on 190-Popular only).
- ii) Place both back rest cushions vertically up against the seat base boxes (be careful not to block output from the furnace).
- iii) Pull each seat cushion 3" (8 cm) from the wall to provide additional elbow room while sleeping.

To convert back to a dinette, perform these steps in reverse order.

#### **B.4. REAR KING-SIZE BED (190-Popular and 210-Popular)**

To convert the dinette into a king-size bed:

- i) Remove the privacy curtains from their velcro supports on the lower edges of the suspended cupboard and pantry (190-Popular only).
- ii) Remove the table and legs from their receptacles and place the table on the lateral supports of the seat base boxes as far to the front as the supports allow.
- iii) Place the loose support board (located inside the rear storage trunk or passenger side dinette seat base box) on these same lateral supports as far to the rear as the supports allow.
- iv) Slide the left seat cushion in toward the center of your vehicle.
- v) Place the left back rest cushion against the wall and as far to the rear as possible.
- vi) Place the filler cushion against the wall and as far to the front as possible (below suspended cupboard or pantry).
- vii) Slide the left seat cushion out toward the wall of your vehicle against the edges of the back rest and filler cushions.
- viii) Repeat the fourth to seventh steps on the right side.
- ix) Place the inner edges of two seat cushions together and lay them flat.

To convert back to a dinette, perform these steps in reverse order.

#### **B.5. FRONT LOUNGE SEAT(S) (all models)**

To convert the lounge seat into a single bed:

- i) For the driver side seat, swivel the driver captain's seat counter-clockwise (see A.1.c.) so that it is facing outward towards the door. For the passenger side seat, swivel the passenger captain's seat counter-clockwise (see A.1.c.) so that it is facing inward towards the driver seat. Be sure all arm rests are in an upright position.
- ii) Lift the back rest cushion upward, remove it from its metal support and place it flat on the seat cushion.
- iii) Lift up the seat cushion and pull forward until it is up against the swiveled captain's seat.
- iv) Swing down the hinged support board (located on the galley or closet partition).
- v) Place the back rest cushion with the upper edge against the galley or closet partition. (Take care to ensure that the back rest cushion's upholstery is not damaged by its metal support located on the galley or closet partition.)
- vi) Push flat so that the round knobs (located on the back of the back rest) are inside the seat base box.

To convert back to a lounge seat, perform these steps in reverse order. When placing the seat cushion back in place, be sure to slide it in all the way back towards the galley partition and then down securely in place.

The lounge seats are designed to carry passengers while your vehicle is in motion and are equipped with seat belts installed for their protection. All passengers must be seated in these seats and the front captain's seats only with seat belts fastened while vehicle is in motion. **All other seats are not to be occupied while vehicle is in motion.**

The lap belts must be worn across the hips and not across the abdomen. Passengers must sit well back in the seat and in an upright position.

## **C.0. LOCATION OF APPLIANCES**

The LP gas furnace is located in the dinette or gaucho seat box on the passenger side of your vehicle. It is normally accessed below the dinette on the inside of your vehicle.

The optional LP gas water heater is located in the dinette or gaucho seat box on the passenger side of all Dodge models and Chevrolet 170 models, in the cabinet below the stove on Chevrolet 190-Versatile, 190-Independent and 210 models, or in the dinette seat box on the driver side of Chevrolet 190-Popular. It is normally accessed through the water heater access door located on the exterior of your vehicle.

The optional 110V generator or generator compartment is located in the rear of the dinette seat box on the driver side of your vehicle. It is normally accessed through the generator access door located on the exterior driver side of your vehicle.

The 110/12V converter/charger is located in the dinette seat box on the driver side of all Dodge models and Chevrolet 190 and 210 models or in the gaucho seat box on the passenger side of the Chevrolet 170 models. It is normally accessed below the dinette or gaucho on the inside of your vehicle. To open the access door to the converter, twist the square locking knob 1/4 turn and pull open.

The auxiliary battery is located in the dinette seat box on the driver side of all models except Chevrolet 170 models where it is at floor level below the wardrobe on the passenger side. Access to same can be achieved from within your vehicle through an access panel. The battery isolator is located on the fire wall under the hood of your vehicle.

The 12V water pump is located at floor level inside the cabinet below the stove.

The LP gas leak detector is located at floor level below the dinette or gaucho on the driver side of your vehicle.

The carbon monoxide leak detector is located on the gable beside the stove to the rear of your vehicle.

The swiveling TV shelf is located on the driver side of all models in the dinette area. Do not exceed the shelf's weight limitation of 20 Kg (40 lbs.) and remove the TV while the vehicle is in motion.

See appropriate component manufacturer's owner's manuals for operating instructions.

## **D.0. WASHROOM AND PRIVACY AREA**

### **D.1. PRIVACY DOOR (170-Versatile)**

When privacy is required, open the door in front of the toilet and until it rests against the gable beside the microwave oven.

When the privacy door is returned to a closed position, ensure it is secured to prevent it from opening while traveling.

## **D.2. PRIVACY DOORS (190-Versatile, 190-Independent and 210-Popular)**

When privacy is required:

- i) Open both privacy doors until they are parallel with the galley partitions.
- ii) Release the plastic turn tabs that secure the inner doors and extend these doors until privacy is achieved.
- iii) The doors can be secured in this position by the plastic turn tabs (or hooks on models equipped with a sit-down tub and shower) located on the galley partitions.
- iv) Complete privacy can now be achieved by closing the curtain at the galley window.
- v) If desired, the privacy doors can be extended from the outside and secured using the plastic turn tabs located on the inner doors.

When the privacy doors are returned to a closed position, ensure they are secured to prevent the doors from opening while traveling.

## **D.3. PRIVACY DOORS (190-Popular)**

When privacy is required:

- i) Open the door on the suspended cupboard on the passenger side of your vehicle.
- ii) Open the door on the suspended pantry on the driver side of your vehicle.
- iii) If desired, hang the curtains from the velcro located on the lower edges of these doors to maintain complete privacy.
- iv) Depress the finger catch located on the right edge on the left privacy door and open the door slightly.
- v) Release the finger catch that secures the front door.
- vi) Simultaneously extend both portions of the door on an angle across the aisle to the gable between the stove and the wardrobe.

## **D.4. TOILET**

See appropriate component manufacturer's owner's manuals for operating instructions.

## **D.5. STAND-UP AISLE SHOWER (optional)**

To set up the stand-up aisle shower:

- i) If possible, park your vehicle sloping slightly to the rear to prevent water from running to the front of the lowered floor while showering (otherwise, any excess water can be directed to the drain with a rag).
- ii) Extend all privacy doors (see D.0.).
- iii) Release the velcro retention straps and place the hand-held shower head on the lowered floor.
- iv) Draw the shower curtain until you are completely surrounded.
- v) Using the velcro connectors, secure the edges of the curtain together allowing the shower hose to enter the shower area above the bottom velcro connector.
- vi) When adjusting the water temperature, be sure to allow enough time for the temperature adjusted water to exit the shower head before making further adjustments.
- vii) To conserve water, discontinue the water flow at the shower head between wetting and rinsing.

To put away the stand-up shower:

- i) Rinse and dry the shower curtain thoroughly (this function is most easily performed before leaving the shower area after use).
- ii) Allow the curtain to air dry completely (this function can be expedited if your vehicle is equipped with an optional power roof vent).

- iii) Follow the above instructions for stand-up shower set up in reverse order.

To prevent grey water tank contents from spilling onto the floor while driving, keep the drain plug secured at all times.

**D.6. SIT-DOWN TUB AND SHOWER WITH SWING-OUT WARDROBE (190-Independent and 210-Popular equipped with sit-down tub and shower)**

If your vehicle is equipped with a sit-down tub and shower, the wardrobe can be used without any instructions.

To set up the sit-down tub and shower:

- i) Remove the dinette table or convert the dinette into a double bed (see B.2., 190-Independent only).
- ii) Open both privacy doors (with the rear door extending out over the bed).
- iii) Fold down the upper portion of the tub cover.
- iv) Using both hands, lift the tub cover simultaneously up and away from the tub and then down until it rests vertically against the end of the tub.
- v) With the clothes still on the hangers and while supporting the weight of the clothing, disengage the barrel bolt located at the left of the clothing rack on the underside of the shelf and swing the entire rack and shelf out over the bed.
- vi) Release the shower curtain straps and extend the curtain around the shower stall along the curtain rod.
- vii) Secure the shower curtain at either end using the velcro fasteners located at the top and bottom edge of the curtain.

To put away the sit-down tub and shower:

- i) Rinse and dry the shower curtain and stall thoroughly (this function is most easily performed before leaving the shower stall after use).
- ii) Allow the curtain and stall to air dry completely (this function can be expedited if your vehicle is equipped with an optional power roof vent).
- iii) Follow the above instructions for sit-down shower set up in reverse order.

To prevent grey water tank contents from spilling into the shower tub while driving, keep the tub's drain plug secured at all times.

## **E.0. WATER SYSTEM**

Your vehicle is equipped with a water system for either completely self contained or fully dependent use. During self contained use, caution should be taken so as to minimize water consumption. For example, water consumption can be reduced while showering if you turn off the shower between wetting down and rinsing off.

To avoid damage due to road vibrations, be sure not to store heavy or sharp objects where they may come into contact with either the water lines, water pump or tub. Also, allow sufficient room around the pump for proper operation.

### **E.1. FRESH WATER TANK**

The fresh water tank can be filled through the gravity fill located in the passenger door step well. To fill the tank:

- i) Open the passenger door and open the gravity fill cover.
- ii) Remove the plug, insert the hose and fill the tank using moderate pressure. (Excessive pressure will result in a back flow of water.)
- iii) When the tank is full, water will overflow through the air vent at the top of the tank into the passenger step well.

The fresh water tank can also be filled through the city water connection located behind the large access door on the driver side of your vehicle. To fill the tank:

- i) Connect a hose to the city water connection (see E.2. below).
- ii) Open the front tap located at the city water connection.
- iii) Open the water source moderately.
- iv) When the tank is full, water will overflow through the air vent into the passenger step well.

### **E.2. CITY WATER CONNECTION**

The city water connection is located behind the large access door on the driver side of your vehicle. To connect the water system to an outside source:

- i) Ensure that the water pump is turned off.
- ii) Be sure that all interior water outlets are closed to prevent spillage.
- iii) Close the front tap at the city water connection to prevent the fresh water tank from being filled.
- iv) If your vehicle is equipped with an optional water heater, close the rear tap at the city water connection to prevent water from exiting from the hot water system drain.
- v) Remove the city water connection cap and the white plug from the compartment floor below the city water connection.
- vi) Run the hose through this opening and connect it to the city water connection.
- vii) Open the city water source moderately to prevent excessive water force inside your vehicle. (To protect your system from excessive pressure from water supply systems encountered in some areas, a water pressure regulator should be used. Such a regulator is not supplied with your vehicle.)
- viii) Note that this connection bypasses the water pump and fresh water tank. Therefore, the use of these items is not necessary when connected directly to an external water source.

To disconnect the city water connection:

- i) Turn off the external water source.
- ii) Open the sink faucet to relieve the pressure in the system (failure to do so may result in an unexpected shower).

- iii) Remove the hose from the city water connection, replace the cap and replace the plug in the compartment floor.

### **E.3. WASTE WATER STORAGE AND DUMPING SYSTEM**

Your vehicle is equipped with a waste water storage and dumping system that will provide adequate and effective storage and dumping of waste water. Your vehicle should be as level as possible to allow optimal operation of the system.

**CAUTION:** Ensure that both the black and grey water gate valves, located behind the small access door below the driver step well, are closed (inward position) before using the waste water system.

#### **E.3.a. Waste Tank Preparation**

Your vehicle is equipped with two waste water tanks; the grey water tank is for waste water from the sink and shower (if equipped) and the black water tank is for sewage from the toilet. Both tanks are equipped with separate dump valves so that each may be dumped independently. Before use of either waste tank, be sure to read instructions provided by the toilet manufacturer regarding waste water chemicals.

#### **E.3.b. Waste Tank Dumping**

Waste water tank contents must be dumped in authorized facilities only. To completely clear the waste water tanks of all solid material, tanks should be full to provide the necessary volume required for complete dumping. If you wish to dump a partially full tank, it is advisable to fill the remaining volume with water first. Also, to completely clear the tanks of all solid material, tanks should be dumped immediately after road travel while tank contents are unsettled.

To dump the black water tank:

- i) Ensure that the upper "T" shaped black water gate valve handle is closed (inward position).
- ii) Remove the small cap located on the front of the sewage hose assembly and swing the support arm so that the assembly can be pulled out.
- iii) Remove the assembly cover.
- iv) Connect the dump fitting (stored in the storage compartment behind the large access door) to the end of the assembly.
- v) Securely place the dump fitting and assembly in the local waste receptacle.
- vi) Pull the black water gate valve handle to dump the tank contents.
- vii) Once the tank is empty, close the gate valve, remove the fitting, return the assembly to its support structure and ensure that all caps and supports are securely in place.

To dump the grey water tank:

- i) Follow the same procedure using the inner grey water gate valve handle located below the black water gate valve handle.
- ii) Be sure to dump the grey water tank last so as to help flush out any solid waste in the sewage hose from the black water tank.
- iii) If desired, flush both waste tanks after dumping.

#### **E.3.c. Waste Tank Flushing**

To flush the waste water tanks:

- i) Ensure that both tanks are empty (see above).
- ii) Fill the black water tank using the toilet and the grey water tank using the sink.

- iii) Dump both tanks using the procedure outlined in section E.3.b.

Both waste water tanks can be flushed using a similar procedure, but rather than filling each tank using the potable water system, they can be filled by inserting a hose directly into the sink and toilet.

#### **E.4. POTABLE WATER SYSTEM DRAINING**

To completely drain the fresh water system of all water:

- i) Ensure that the water pump is off and that your vehicle is level.
- ii) Drain the fresh water tank and cold fresh water system by removing the threaded cap at the low point drain attached to the sewage hose assembly behind the small access door directly below the driver step well.
- iii) If your vehicle is equipped with an optional water heater, follow manufacturer's draining instructions and open the rear tap at the city water connection to drain the hot water system.
- iv) Open the sink faucet and turn on the water pump until water is no longer pumped.
- v) Turn off the water pump.
- vi) Open all water outlets including the sink faucet, shower faucet (if equipped) and toilet flushing pedal. The latter can be propped open or opened manually several times. This procedure allows gravity to draw any remaining water out through the tank and city water connection drains.
- vii) Disconnect and drain the P-traps of the sink and shower (if equipped). (Shower P-trap is located on the vehicle underside to the rear of the waste water tanks.)

If this procedure is followed, it is unnecessary to blow out the water system. Once the system is drained, be sure to close all taps before driving.

#### **E.5. POTABLE WATER SYSTEM SANITIZING**

Your potable water system should be sanitized if it is new, has not been used for a period of time, or may have become contaminated.

To sanitize your system:

- i) Prepare a chlorine solution using 4 L (1 gallon) of water and 60 ml (1/4 cup) of household bleach (5% sodium hypochlorite solution).
- ii) With the fresh water tank empty (see E.3.b.), pour 4 L (1 gallon) of solution into the tank for each 60 L (15 gallon) of tank capacity. (As an alternative, several commercial solutions are available and should be used as directed on the package.)
- iii) Complete filling of the tank with fresh water (see E.1.).
- iv) Turn on the water pump and slowly open all faucets to release trapped air.
- v) Allow to stand for 3 hours then drain and flush with fresh potable water (see E.3.).
- vi) To remove excessive chlorine taste or odor which may remain, prepare a solution of 1 L (1 quart) vinegar to 20 L (5 gallons) water and pour into tank and allow solution to agitate in tank by vehicle motion (several days if possible).
- vii) Drain tank and flush with fresh potable water (see E.3.).

#### **E.6. POTABLE WATER SYSTEM WINTERIZING**

To winterize your potable water system:

- i) Drain the entire system (see E.4.).
- ii) Add 2 L (1/2 gallon) of approved non-toxic recreational vehicle anti-freeze to the fresh water tank using the gravity fill (see E.1.). (If your vehicle is equipped with an optional water heater, a

by-pass kit is required to avoid filling the water heater storage tank with anti-freeze. Otherwise, use 25 L (6.5 gallons) of anti-freeze.)

- iii) Turn on the water pump.
- iv) Open both faucets until anti-freeze is visible.
- v) Open the toilet valve until anti-freeze is visible.
- vi) Turn off pump.

To prepare your potable water system for use:

- i) Drain the anti-freeze from the system (see E.4.).
- ii) Sanitize the system if desired (see E.5.).
- iii) Fill the system with water (see E.1.).

## **E.7. WINTER USE**

We recommend that you do not use the water system during freezing weather and ensure that it is properly drained (see E.3.b. and E.4.) or winterized (see E.6.) before the temperature falls below freezing.

If use of the water system is necessary under freezing conditions, use portable water containers and anti-freeze in the waste water tanks. Be sure to use an approved non-toxic recreational vehicle anti-freeze and follow the manufacturer's instructions carefully to ensure that damage to the system will not occur.

## **F.0. ELECTRICAL SYSTEM**

Your vehicle's electrical system should not be subjected to changes and/or additions to circuitry, appliances, etc. without consulting your dealer for proper installation procedures.

### **F.1. 110/12V CONVERTER/CHARGER**

The 110/12V converter/charger is located in the dinette seat box on the driver side of all Dodge models and Chevrolet 190 and 210 models or in the gaucho seat box on the passenger side of the Chevrolet 170 models. It is normally accessed below the dinette or gaucho on the inside of your vehicle. To open the access door to the converter, twist the square locking knob 1/4 turn and pull open.

See appropriate component manufacturer's owner's manuals for operating instructions.

### **F.2. EXTERNAL ELECTRICAL SOURCE CONNECTION**

Your vehicle is equipped with a heavy duty 30 amp. power cord so that you can connect your electrical system to an outside 110V (in Canada) or 120V (in U.S.) power source. The power cord is stored in the storage compartment located behind the large access door. A 30 to 15 amp. adaptor is not included with your vehicle.

When connecting your system to an outside source, ensure that a properly equipped (three pronged) and functioning receptacle is used. If any type of spark or shock is detected, disconnect from the source immediately and do not reconnect until the problem is corrected.

### **F.3. GENERATOR (optional)**

In addition to the operating instructions contained in the generator manufacturer's owner's manual, be aware that the generator's spark plug can be removed without removing the generator from its compartment by using a 13/16" spark plug socket that can be turned with a wrench and an appropriately sized wrench rather than a ratchet.

### **F.4. BUILT-IN 110V AIR CONDITIONER (optional)**

In addition to the operating instructions contained in the manufacturer's owner's manual, the air conditioner should be started as follows when the optional generator is used:

- i) Start the generator and operate for several minutes until warm.
- ii) Ensure the thermostat is set at its warmest setting (1).
- iii) Turn air conditioner master control to "low cool" position.
- iv) Adjust the thermostat cooler (towards "8") until the compressor starts.
- v) Once the compressor is running, adjust master control and thermostat to desired settings.

Your vehicle should be parked as close to level as possible to maximize the air conditioner's efficiency. Since the air conditioner requires water for cooling, water may spill from the front of the air conditioner during abrupt stops or while parked on a steep forward slope.

### **F.5. MONITOR PANEL**

A monitor panel, located on the front closet gable above the right lounge seat, is provided to monitor the approximate fluid levels in the fresh, grey and black water tanks and charge level in the auxiliary battery.

Regarding the water tank levels, be aware that the panel does not always reflect actual fluid levels. For example, when the 1/3 level light is on, the tank may be anywhere from 1/3 to just under 2/3 full. Or when the panel reads empty, the tank may be anywhere from empty to just under 1/3 full.

If you do not regularly use a sanitation fluid in your black and grey water tanks, the tanks must be flushed periodically with sanitation fluid to prevent the accumulation of solids on the probes so as to maintain accurate black and grey water level readings. To flush:

- i) If necessary, dump the black and grey water tanks (see E.3.).
- ii) Add 20 L (5 gallons) of a water and sanitation fluid solution mixed as recommended by the fluid manufacturer.
- iii) Drive your vehicle until numerous stops, starts and turns have been achieved.
- iv) Dump and flush the black and grey water tanks (see E.3.).

The auxiliary battery charge level indicator is marked "C", "G", "F", and "L". "C" indicates the battery is being charged by the converter/charger. "G" means the battery charge is "good", "F" indicates "fair", and "L" indicates "low". Note that the battery condition is indicated by the uppermost light that is on. For example, if the "G", "F", and "L" lights are on, the battery charge is "Good".

The panel also provides the switch from the water pump and a disconnect switch for the auxiliary battery.

## **F.6. AUXILIARY BATTERY AND ISOLATOR**

The auxiliary battery is located in the dinette seat box on the driver side of all models except Chevrolet 170 models or at floor level below the wardrobe on the passenger side of the Chevrolet 170 models. Access to same can be achieved from within your vehicle through an access panel.

The battery isolator is located on the fire wall under the hood of your vehicle.

The auxiliary battery is a deep-cycle low maintenance battery. It is not maintenance free which means the fluid levels must be checked and maintained periodically.

The auxiliary battery is automatically charged through the isolator by the engine's alternator while the engine is running. This battery is also automatically charged by the converter/charger when your vehicle is connected to an outside electrical power source and the breakers in the converter/charger are in the "ON" position.

A disconnect switch, located on the monitor panel, provides a disconnect for the auxiliary battery from the 12V system while your vehicle is not in use.

Since the auxiliary battery is deep-cycle, it may be discharged completely and re-charged without damage (whereas the automotive battery is designed to be kept fully charged by the alternator and may undergo damage if fully discharged). However, a fully discharged battery should never remain in this dead state and should be re-charged immediately to prevent damage. In addition, a fully discharged battery can cause the alternator to malfunction (Chevrolet only). When not in use, the auxiliary battery will slowly discharge on its own. Accordingly, if the battery is not being used, it should be re-charged every monthly by connecting to an outside electrical power source or operating the generator (if equipped) for at least 12 hours.

The isolator is located under the hood in the engine compartment. The isolator allows the alternator to charge both the automotive and auxiliary batteries when the engine is running. However, it will prevent your vehicle's 12V motor home equipment (interior lights, water pump, exhaust fans, furnace blower, etc.) from drawing on the automotive battery (through the auxiliary battery) while the engine is not running.

For a further explanation of the operation of the auxiliary battery and isolator, see the owner's manual for the converter/charger.

## **F.7. AUTOMOTIVE BATTERY**

The electronic radio in your vehicle will exert a small draw on the automotive battery to maintain the time and preset stations. To prevent damage to the battery from being drained, the radio should be disconnected from the automotive battery when your vehicle will not be driven for 2 months or more.

For all Dodge models, the radio can be disconnected by a white "quick connect/disconnect" coupling located under the hood to the left of the battery. To disconnect, grasp the upper and lower portions of the coupling, depress the release on the upper portion, and pull the portions apart. Be sure to reconnect the coupling before use.

For Chevrolet, the radio can be disconnected by removing the 10 amp. radio fuse from the fuse block located at the left underside of the dash.

## **F.8. INTERIOR CAB LIGHT AND IGNITION LIGHT**

The interior 12V cab light located on the underside of the cabinet over the windshield has a multipurpose switching system. This switching system utilizes the switch on the light itself and the dash mounted headlight switch located to the left of the steering wheel. These switches can be set for three types of use:

### **F.8.a. Driving**

By turning the headlight switch to the center position and turning the cab light switch on, the cab light will turn on when a door is open and turn off when all doors are closed. To turn on the cab light with doors closed, turn the headlight switch all the way to the left (be aware that the ignition light will turn on also). This is similar to the normal operation of the interior lights in a car.

### **F.8.b. Stationary Use (Doors Closed)**

By turning the headlight switch all the way to the left, the cab light can be turned on and off using its own switch with the doors closed (be aware that the ignition light will turn on also). This is similar to the normal operation of the other interior lights in your vehicle except that the cab light and ignition light draw from the automotive battery and not the auxiliary battery or converter/charger. Accordingly, excessive use may drain your automotive battery!

### **F.8.c. Stationary Use (Doors Open)**

On Dodge vehicles, the cab light and ignition light will remain off with the doors open by turning the headlight switch all the way to the right. To achieve the same result, do not leave the headlight switch in the center position (as in F.8.a.) and turn off the cab light switch or you may drain your automotive battery.

On Chevrolet vehicles, the cab light can be controlled by the automotive interior light switch located on the dash to the right of the steering column.

## **F.9. RANGE HOOD EXHAUST FAN**

The range hood exhaust fan should be on while the LP gas stove is in operation.

The range hood is equipped with a damper control to reduce noise created by the damper flapping while driving and to reduce water entry while washing your vehicle. The damper control is a steel loop, is located to the front of the exhaust fan motor, and is accessed from the underside of the range hood. To close the damper, push the control to the rear of your vehicle. To open, pull the control to the front.

## **G.0. LP GAS AND SAFETY SYSTEM**

Your vehicle is equipped with an LP gas system which, when properly handled and maintained, will provide trouble and worry free operation of your LP gas fueled appliances.

LP fuel is stored in a liquid form under extremely high pressure within a tank located behind the small access door below the driver step well. As fuel is used, LP gas passes from the top of the tank through the regulator into the gas lines and eventually to the appliances.

Although the entire system has undergone extensive factory and dealer testing for leaks, the system's connections and fittings are subjected to road vibrations and therefore **should be checked annually for possible leaks.**

LP gas is extremely flammable, colorless, heavier than air and smells like garlic or rotten eggs.

**IF YOU SMELL GAS**, extinguish any open flames, pilot lights and smoking materials immediately. Do not touch any electrical switches. Shut off the gas supply at the tank valve. Open doors and windows to provide maximum ventilation. Leave the area until the odor clears. Have the system checked and the leak corrected before use.

**WARNING:** LP gas tanks shall not be placed or stored inside your vehicle. LP gas tanks are equipped with safety devices which relieve excessive pressure by discharging gas to the atmosphere.

**WARNING:** To reduce the danger of fire or explosion, do not store LP gas tanks, gasoline or other flammable liquids inside your vehicle.

### **G.1. APPLIANCES**

**WARNING:** It is not safe to use cooking appliances for space heating purposes.

The LP gas stove needs fresh air for its safe operation. Because the amount of oxygen supply is limited due to the size of your vehicle, before operation of the LP gas stove, open the overhead vent or a window or turn on the range hood exhaust fan (see F.8.). Proper ventilation when using the LP gas stove will reduce the dangers of asphyxiation. It is especially important that the LP gas stove not be used for comfort heating purposes as the danger of asphyxiation is greater when the appliance is used for long periods of time.

**WARNING:** Portable fuel burning equipment, including wood and charcoal grills and stoves, shall not be used inside your vehicle. Use of this equipment inside your vehicle may cause fire or asphyxiation.

See appropriate component manufacturer's owner's manuals for operating instructions.

### **G.2. REFUELING PROCEDURES**

**WARNING:** Do not refuel LP gas tank to more than 80% of capacity.

A properly refueled LP gas tank will contain approximately 80% of its volume as liquid LP gas. Over fueling of the LP gas tank can result in uncontrolled gas flow which can cause fire or explosion.

**WARNING:** The tank valve must be closed and **ALL PILOT LIGHTS AND APPLIANCES TURNED OFF (INCLUDING REFRIGERATOR)** before refueling of LP gas tank or motor fuel tank. Only qualified personnel should refuel your LP gas tank.

### **G.3. REGULATOR**

The LP gas regulator in your vehicle (located behind the small access door below the driver step well) has been installed with the diaphragm vent facing downward and equipped with a protective cover. Ensure that the regulator vent always faces downward and that the cover is kept in place to minimize vent blockage which could result in excessive gas pressure causing fire or explosion.

### **G.4. LP GAS LEAK DETECTOR**

Your vehicle has been equipped with a LP gas leak detection device for your protection. It is located at floor level below the dinette or gaucho on the driver side of your vehicle.

**Be sure the detector is turned on while using your vehicle.** See manufacturer's owner's manual for other operating instructions.

### **G.5. CARBON MONOXIDE LEAK DETECTOR**

Your vehicle has been equipped with a carbon monoxide (CO) leak detection device for your protection. It is located on the driver side gable beside the stove or pantry to the rear of your vehicle.

**Be sure the detector is turned on while using your vehicle.** See manufacturer's owner's manual for other operating instructions.

### **G.6. SMOKE DETECTOR**

Your vehicle has been equipped with a smoke detection device for your protection. This device should be tested after each time your vehicle has been in storage, before each use, and at least once each week during your vehicle's use. (Upon delivery of your vehicle from the factory, the detector is inoperative because the battery is reversed to prevent drainage. Before operation, reverse the battery to the proper position and test the operation of the detector).

## **H.0. MAINTENANCE**

### **H.1. FIBERGLASS MAINTENANCE**

To maintain the original appearance and finish, your vehicle's fiberglass roof and running boards must be waxed at least annually. If deterioration, such as tarnishing or chalking, should occur, apply a rubbing compound and wax to restore the original appearance.

### **H.2. EXTERIOR WASHING**

To prevent water from entering your vehicle, avoid spraying water directly into all exterior vents or grills.

### **H.3. OTHER MAINTENANCE**

For necessary maintenance of other components and appliances, see their respective manufacturer's owner's manuals for instructions.

## **I.0. WINTER STORAGE**

### **I.1. INSIDE YOUR VEHICLE**

Before winter storage:

- i) Be sure to clean your vehicle thoroughly. Special emphasis should be given to the appliances, such as the refrigerator.
- ii) Once cleaned, leave the refrigerator door open to prevent the development of odors (insert a box of baking soda if desired).
- iii) Open a window slightly allowing sufficient air circulation to avoid the development of odors, condensation and mildew.
- iv) To prevent sun rays from deteriorating and fading interior fabrics, cover all upholstered seats and cushions. As a further precaution, close all drapes tightly.
- v) Disconnect the auxiliary battery using the disconnect switch located in the monitor panel.

### **I.2. OUTSIDE YOUR VEHICLE**

Before winter storage:

- i) Ensure that all waste water tanks have been dumped and flushed (see E.3.b.) and that the entire potable water system has been properly drained (see E.4.) or winterized (see E.6.).
- ii) Be sure to cover the external vents to the refrigerator, exhaust fan, furnace and air conditioner (if equipped) with heavy plastic sheeting to prevent entry by rodents and insects.
- iii) To improve tire life and maintain performance, put your vehicle up on blocks. Also, cover all tires exposed to sun light to prevent deterioration from ultra-violet rays.
- iv) Consult your automotive owner's manual or local automotive dealer regarding steps necessary to prevent engine and chassis damage during long periods of storage in your particular region.

### **I.3. SPRING START UP**

After storage, re-activate your vehicle for use by reversing all the procedures that you performed to prepare it for winter storage. In addition, **LP gas system's connections and fittings should be checked for possible leaks** and all other systems and appliances should be operated to ensure satisfactory performance.

## J.0. WARRANTY

### J.1. DEFINITIONS

<b>Home &amp; Park</b>	<b>Home &amp; Park Motorhomes</b> (A Division of HANMAR MOTOR CORPORATION)
<b>Dealer</b>	Dealer or any wholesale buyer of recreational vehicles, authorized by <b>Home &amp; Park</b> .
<b>Vehicle</b>	Any recreational vehicle manufactured by <b>Home &amp; Park Motorhomes</b> .
<b>Purchaser</b>	Registered owner of the <b>Vehicle</b> and/or purchaser of the <b>Vehicle</b> .

All vehicles are covered by a three part limited warranty: Automotive Warranty, Appliance Warranty, and Home & Park Motor Home Warranty.

### J.2. HOME & PARK WARRANTY REGISTRATION CARD

**It is very important that the Dealer complete the Warranty Card on each Vehicle and mail it to Home & Park within 30 days from the date of retail delivery.**

Home & Park uses the information on the Warranty Card to notify Chrysler (U.S. only) or General Motors to **re-start the automotive (chassis) warranty** in the Purchaser's name as of the date of retail delivery. (In Canada, the Chrysler automotive warranty is restarted in the Purchaser's name by the Dealer mailing the completed **Chrysler Specialty Vehicle Warranty Registration** form to Chrysler.) If Home & Park doesn't receive this information, when the Purchaser tries to have automotive warranty work done, the Purchaser, the Dealer and Home & Park may be inconvenienced until this information is received and processed by Chrysler or General Motors.

Home & Park also uses the Warranty Card information to **maintain records for the Home & Park motor home warranty and recall notifications**. If Home & Park doesn't receive this information, when the Purchaser tries to have Home & Park warranty work done, the Purchaser, the Dealer and Home & Park will be inconvenienced until Home & Park receives this information. In the event of a product defect recall, the Dealer must research its sales records to provide this information.

### J.3.a. AUTOMOTIVE WARRANTY- Chrysler (Dodge chassis) in the U.S.

In the U.S., the warranty currently offered by Chrysler covering the manufacture of the Dodge chassis. Although the Purchaser will receive the full time period of the warranty, such warranty does not make an allowance for the miles on the odometer at the date of retail delivery. In other words, the warranty ends when the odometer reading reaches the limit as specified by the selected warranty regardless of the odometer reading at the date of retail delivery. See the Chrysler Warranty Information booklet for details.

Home & Park uses the information on the completed Warranty Card to notify Chrysler to **re-start the automotive warranty** in the Purchaser's name as of the date of retail delivery. Upon receipt of the Warranty Card, Home & Park completes and mails the appropriate forms to Chrysler who in turn enters this information into its computer system (please allow 8 to 12 weeks for this information to be processed and appear on its computer system).

If Home & Park doesn't receive the completed Warranty Card, when the Purchaser tries to have automotive warranty work done, the Purchaser, the Dealer and Home & Park may be inconvenienced until this information is received and processed by Chrysler.

All automotive service, maintenance and repairs are to be performed by any Chrysler, Dodge or Plymouth dealer. See the Chrysler Warranty Information booklet for details. Items such as the above are not warranted by Home & Park. Home & Park will pay for the removal and reinstallation of motor home components necessary to perform **repairs** under this automotive warranty for **three (3) years, or 36,000 miles** whichever occurs first, from date of purchase by the first Purchaser. However, Home & Park **will not** pay for the removal and reinstallation of motor home components necessary to perform **repairs** under this automotive warranty after this period. Further, Home & Park **will not pay** under any circumstances for the removal and reinstallation of motor home components necessary to perform automotive **service, maintenance or repairs not under warranty**. Such costs are considered to be inherent in the ownership of such a vehicle.

Regarding Chrysler rebates, the Dealer must **check "yes" or "no" after "Has a Chrysler or Chevrolet rebate been applied for?" on the bottom of the warranty card**. If "yes" is checked, Home & Park will not notify Chrysler to re-start the warranty in the Purchaser's name because this has automatically been done by the Dodge dealer via the rebate application. This will avoid confusion from Chrysler receiving two conflicting sources of warranty information.

### **J.3.b. AUTOMOTIVE WARRANTY- Chrysler (Dodge chassis) in Canada**

In Canada, the warranty currently offered by Chrysler covering the manufacture of the Dodge chassis. The Purchaser will receive the full time period **and distance** of the warranty. In other words, the warranty is started as of the date of retail delivery and extended by an amount equal to the kilometers on the odometer at the date of retail delivery. See the Chrysler Warranty Information booklet for details.

To restart the Chrysler warranty in the Purchaser's name, the Dealer must complete the **Van Conversion Registration** form provided with your Vehicle and mail it to Chrysler.

If Chrysler doesn't receive the completed **Van Conversion Registration** form, when the Purchaser tries to have automotive warranty work done, the Purchaser, the Dealer and Home & Park may be inconvenienced until this information is received and processed by Chrysler.

All automotive service, maintenance and repairs are to be performed by any Chrysler, Dodge or Plymouth dealer. See the Chrysler Warranty Information booklet for details. Items such as the above are not warranted by Home & Park. Home & Park will pay for the removal and reinstallation of motor home components necessary to perform **repairs** under this automotive warranty for **three (3) years, or 60,000 Km** whichever occurs first, from date of purchase by the first Purchaser. However, Home & Park **will not** pay for the removal and reinstallation of motor home components necessary to perform **repairs** under this automotive warranty after this period. Further, Home & Park **will not pay** under any circumstances for the removal and reinstallation of motor home components necessary to perform automotive **service, maintenance or repairs not under warranty**. Such costs are considered to be inherent in the ownership of such a vehicle.

### **J.3.c. AUTOMOTIVE WARRANTY- General Motors (Chevrolet chassis) in the U.S.**

In the U.S., the warranty currently offered by General Motors covering the manufacture of the Chevrolet chassis. The Purchaser will receive the full time period **and distance** of the warranty. In other words, the warranty is started as of the date of retail delivery and extended by an amount equal to the miles on the odometer at the date of retail delivery up to a maximum of 6000 miles. See the General Motors Warranty Information booklet for details.

Home & Park orders its Chevrolet chassis from both **GM Canada** and **Chevrolet Motor Division** and sells these chassis through both **RV Dealers** and **Chevrolet Dealers**.

For Chevrolet chassis ordered from **Chevrolet Motor Division** and sold through **Chevrolet Dealers**, the Dealer will enter the appropriate information directly into General Motors' computer system to **re-start the automotive (chassis) warranty** in the Purchaser's name as of the date of retail delivery.

For Chevrolet chassis ordered from **GM Canada** and sold through both **RV and Chevrolet Dealers** and for chassis ordered from **Chevrolet Motor Division** and sold through **RV Dealers**, Home & Park uses the information on the completed Warranty Card to notify General Motors to **re-start the automotive (chassis) warranty** in the Purchaser's name as of the date of retail delivery. Upon receipt of the Warranty Card, Home & Park completes and mails the appropriate forms to General Motors who in turn enter this information into their computer systems. This process can take up to 6 weeks from when the Dealer mails the Warranty Card. If warranty work is required before this process is completed and your Vehicle's V.I.N. appears on the computer, the Purchaser should ask the Chevrolet dealer to enter the Purchaser's name and address and date of retail delivery into the computer. To prove your Vehicle is still under warranty, the Purchaser should show a copy of the bill of sale to the Chevrolet dealer.

All automotive service, maintenance and repairs are to be performed by any Chevrolet dealer. See the General Motors Warranty Information booklet for details. Items such as the above are not warranted by Home & Park. Home & Park will pay for the removal and reinstallation of motor home components necessary to perform **repairs** under this automotive warranty for **three (3) years, or 36,000 miles** whichever occurs first, from date of purchase by the first Purchaser. However, Home & Park **will not** pay for the removal and reinstallation of motor home components necessary to perform **repairs** under this automotive warranty after this period. Further, Home & Park **will not pay** under any circumstances for the removal and reinstallation of motor home components necessary to perform automotive **service, maintenance or repairs not under warranty**. Such costs are considered to be inherent in the ownership of such a vehicle.

### **J.3.d. AUTOMOTIVE WARRANTY- General Motors (Chevrolet chassis) in Canada**

In Canada, the warranty currently offered by General Motors covering the manufacture of the Chevrolet chassis. The Purchaser will receive the full time period **and distance** of the warranty. In other words, the warranty is started as of the date of retail delivery and extended by an amount equal to the kilometers on the odometer at the date of retail delivery up to a maximum of 6500 Km. See the General Motors Warranty Information booklet for details.

For Chevrolet chassis sold through **Chevrolet Dealers**, the Dealer will enter the appropriate information directly into General Motors' computer system to **re-start the automotive (chassis) warranty** in the Purchaser's name as of the date of retail delivery.

For Chevrolet chassis sold through **RV Dealers**, Home & Park uses the information on the completed Warranty Card to notify General Motors to **re-start the automotive (chassis) warranty** in the

Purchaser's name as of the date of retail delivery. Upon receipt of the Warranty Card, Home & Park completes and mails the appropriate forms to General Motors who in turn enter this information into their computer systems. This process can take up to 6 weeks from when the Dealer mails the Warranty Card. If warranty work is required before this process is completed and your Vehicle's V.I.N. appears on the computer, the Purchaser should ask the Chevrolet dealer to enter the Purchaser's name and address and date of retail delivery into the computer. To prove your Vehicle is still under warranty, the Purchaser should show a copy of the bill of sale to the Chevrolet dealer.

All automotive service, maintenance and repairs are to be performed by any Chevrolet dealer. See the General Motors Warranty Information booklet for details. Items such as the above are not warranted by Home & Park. Home & Park will pay for the removal and reinstallation of motor home components necessary to perform **repairs** under this automotive warranty for **three (3) years, or 60,000 Km** whichever occurs first, from date of purchase by the first Purchaser. However, Home & Park **will not** pay for the removal and reinstallation of motor home components necessary to perform **repairs** under this automotive warranty after this period. Further, Home & Park **will not pay** under any circumstances for the removal and reinstallation of motor home components necessary to perform automotive **service, maintenance or repairs not under warranty**. Such costs are considered to be inherent in the ownership of such a vehicle.

#### J.4. APPLIANCE WARRANTY -

Examples such as the following are not warranted by Home & Park, but are covered by individual warranties offered by their respective manufacturers to which terms both Purchaser and Dealer must comply: air conditioner, auxiliary battery, electrical converter/charger, furnace, generator, microwave oven, range hood exhaust fan, refrigerator, stove, toilet, water pump, and water heater. Home & Park makes no warranty whatsoever, regarding these items and/or such like components manufactured by others. However, Home & Park will pay for the removal and reinstallation of such components that it determines at its sole discretion are installed by Home & Park in a manner unusual to the industry.

**Purchaser and/or Dealer are required to deal directly with the nearest service center for such manufactured components** and abide by the warranty policy as allowed by such component manufacturers. The name, location and phone number of some such component manufacturer's are as follows:

<u>Component</u>	<u>Manufacturer</u>	<u>Location</u>	<u>Phone Number</u>
air conditioner (in U.S.)	Fedders Inc.	Effingham, IL	217-342-3901
air conditioner (in Cda.)	Fedders Inc.	Mississauga, ON	905-874-0222
awning	Fiamma	Orlando, FL	407-672-0091
battery - auxiliary (U.S.)	Exide Corporation	Muncie, IN	800-422-6119
battery - auxiliary (Cda.)	Battery Wholesale	Kitchener, ON	519-743-2087
CO detector	MTI	Wauconda, IL	800-383-0269 or 708-487-4940
converter - electrical	Magnatek	Kokoma, IN	317-452-5444
furnace (in U.S.)	Suburban Mfg.	Elkhart, IN	219-294-5681

### **J.5. HOME & PARK MOTORHOME WARRANTY -**

Home & Park warrants to the any Purchaser that the Vehicle is free from defects in material and workmanship on the portion manufactured by Home & Park, under normal use and service, for **three (3) years**, or **36,000 miles** (in U.S.) or **60,000 Km** (in Canada) whichever occurs first, from date of purchase by the first Purchaser or the date the Vehicle was first put into service (for example, as a demonstrator or rental vehicle), whichever is earlier.

This warranty shall be fulfilled at a Home & Park Dealer, any other RV dealer, any other RV service facility, or at the Home & Park factory by appointment only. Home & Park will, at its option, replace or repair, free of charge (including related labour) any defective part, about which the Purchaser shall notify Home & Park or the Dealer within the warranty period. This obligation of Home & Park under this warranty, is expressly limited to such replacement or repair.

Warranty parts shall be shipped by U.P.S. or on the next vehicle delivered to the Dealer. Shipments by courier shall be paid for by the Purchaser (or by the Dealer at his or her discretion).

The provisions of this warranty shall not apply to the following:

- i) accident
- ii) unauthorized repairs or alterations
- iii) normal maintenance
- iv) changes made to other vehicles manufactured after this Vehicle was manufactured
- v) incidental damages connected with the failure of the Vehicle such as lost time, inconvenience, loss of use of the Vehicle, cost of rental cars, gasoline, telephone, travel or lodging
- vi) damages caused by environmental factors such as hailstorms, tornadoes, sandstorms, lightning, floods, earthquakes, airborne fallout, chemicals, tree sap, ocean spray, road hazards
- vii) Vehicle that has been declared a total loss by an insurance company (demolished) or a Vehicle whose title indicates that it is designated as "salvage", "junk", or "rebuilt" or words of similar impact

The provisions of this warranty shall not apply to deterioration due to wear and exposure beyond the following limitations:

- i) For **one (1) year** from date of purchase by the first Purchaser for curtain fabric and tracks, seating fabric, carpet, wall liner fabric, door panel fabric, cup holders, window seals, exterior stripes and decals, exterior painted surfaces, exterior fiberglass surfaces, and running board trim.
- ii) For **ninety (90) days** from date of purchase by the first Purchaser for the sewer hose and black and grey water gate valves.
- iii) For **thirty (30) days** from date of purchase by the first Purchaser for door latch adjustments, light bulbs, fuses, and battery in smoke detector.

This warranty is expressly in lieu of any other expressed or implied warranty, including any implied warranty of merchantability or fitness for a particular purpose and of any other obligations or liabilities on Home & Park which neither assumes nor authorizes any other person to assume for it any other liability in connection with Vehicle manufactured by it.

Home & Park Motorhome Warranty is void unless the following conditions are adhered to:

- i) Warranty Registration Card on each Vehicle must be completed by the Dealer and mailed to Home & Park within 30 days from date of retail delivery. When warranty applications are made and Registration Card is not on file at Home & Park, reimbursement of claim will be delayed until proof of original purchase is submitted to Home & Park.
- ii) All warranty claims submitted must include Vehicle's vehicle identification number (V.I.N.), odometer reading, and Home & Park Warranty Start Date (date of retail delivery).
- iii) **Warranty work that will exceed \$200.00 must first be authorized by Home & Park before proceeding with such work.**
- iv) There shall be no allowance for emergency road repair, towing, labour, meals, accommodations, etc. Such will not be accepted if claimed on warranty.
- v) Components for which no service centre exists may be returned to Home & Park or to another service location authorized by Home & Park for repair or replacement. Shipments arriving at our factory without prior explanation will be returned to sender.
- vi) Only parts and accessories and other material, available through Home & Park are to be used in the performance of warranty service.
- vii) If requested by Home & Park, defective parts replaced under warranty must be returned to Home & Park before reimbursement will be made.

## **K.0. REPORTING SAFETY DEFECTS (U.S. ONLY)**

If you believe that your vehicle has a defect which could cause a crash or could cause injury or death, you should immediately inform the National Highway Traffic Safety Administration (NHTSA) in addition to notifying Home & Park.

If NHTSA receives similar complaints, it may open an investigation, and if it finds that a safety defect exists in a group of vehicles, it may order a recall and remedy campaign. However, NHTSA cannot become involved in individual problems between you, your dealer, or Home & Park.

To contact NHTSA, you may call the Auto Safety Hotline toll-free at 1-800-424-9393 (or 366-0123 in Washington, DC area) or write to:

NHTSA  
U.S. Department of Transportation  
Washington, DC 20590

You can also obtain other information about motor vehicle safety from the Hotline.

## **L.0. POTENTIAL CUSTOMER REFERRAL PROGRAM**

If you're like most Roadtrek owners, you will spend a lot of your valuable time giving tours of your Roadtrek to numerous inquisitive people. We know that many of these potential customers become Roadtrek owners since 26% of our buyers first found out about us from an owner or saw an owner's Roadtrek.

Although many of you are only too glad to show off your Roadtrek, we think it's only fair that you be rewarded for these efforts that are so valuable to us.

Until further notice, we will **pay a \$100.00 commission to any Roadtrek owner who refers a potential customer to us that eventually purchases a new Roadtrek**, subject to these simple conditions:

- i) Home & Park receives a "Potential Customer Referral Card" (sample enclosed) completed and mailed by the potential customer and Roadtrek owner.
- ii) The potential customer purchases a new Roadtrek within 2 years from the date the "Potential Customer Referral Card" is received by Home & Park.
- iii) The potential customer purchases a new Roadtrek and has the dealer complete the "Home & Park Warranty Registration Card" in the same name and address that was inserted on the "Potential Customer Referral Card".
- iv) If more than one Roadtrek owner refers the same potential customer, the \$100.00 commission will be split equally among all of the referring Roadtrek owners.

To participate in this program, just complete the bottom of the enclosed "Potential Customer Referral Card" and check "Send me more referral cards" and, if desired, check "Send me more Roadtrek brochures". Please allow 4 to 6 weeks for delivery.

## **M.0. ROADTREK CLUB INTERNATIONAL**

As a new Roadtrek owner, you are cordially invited to join our family of Roadtrek owners as members of the **"Roadtrek Club International"**. An owners' club offers its members an opportunity to meet other people with common interests, attend enjoyable gatherings (such as group outings, sight seeing, camping, suppers, factory tours, and more!), share travel experiences, keep current on the latest information and products from the factory, and exchange ideas for improvements or solutions to problems. Membership dues are only \$10 per year. Our common bond is the that we are all Roadtrek owners. As a group, we can promote fellowship and enrich our way of life.

**Roadtrek Club International** is an active Chapter of the [Family Motor Coach Association](#). FMCA, the foremost organization in the world composed exclusively for motor home owners, was founded in 1963 for the express purpose of promoting fellowship and the use of motor coaching for pleasure. Many of its 95,000 members meet and form fast friendships with fellow motor homers and join together in Association sponsored activities that are interesting and fun.

FMCA offers benefits and services specially designed to meet the needs of motor home owners that you can't get anywhere else. Although space does not permit listing everything available, member benefits include: free monthly subscription to the full color Family Motor Coaching magazine, minimum cost motor home insurance, trip routing service, toll free 800 number message service, mail forwarding, identification emblems for your motor home, free membership directory, anti-theft program, discount programs, national and regional conventions, and year-round activities in nearly 300 chapters of FMCA for fun, fellowship and entertainment...plus much more. FMCA dues are \$25 per year plus a one time \$10 initiation fee in the first year.

Jack and Belle Schneider, Roadtrek owners in Tucson, Arizona, are Life Members (25 years) and officers in FMCA. Jack is a National Director, sits on the governing Board of FMCA and is a great believer that you can accomplish more as part of a group than you can on your own. He and his wife are helping our members run the "Roadtrek Club International" Chapter.

Accept our invitation and let FMCA work for you! As a Roadtrek owner, become a member of the latest FMCA Chapter: **Roadtrek Club International**. Just complete the applications on the next page and mail them with your checks to the addresses shown. You'll be glad you did!

## **N.O. ADDRESS, PHONE AND FACSIMILE NUMBERS**

Address all inquiries to: Home & Park Motorhomes  
Warranty & Service Department  
100 Shirley Avenue  
Kitchener, Ontario, Canada, N2B 2E1

## ADDRESS CHANGES • NEWSLETTES ARE SENT FIRST CLASS AND ARE FORWARDABLE

We have been receiving requests from many of our members for change of address. It has been our policy to have one address on file. This should be the address that is your **legal residence**. Changing the address seasonally involves too much bookwork, not only for the secretary/treasurer, but for the printing of labels for the newsletter as well. If you spend part of your time in another area, then please arrange to have your mail forwarded to you.
